PROFESSIONAL SUMMARY

Computer Science (AI) graduate with hands-on experience in Java, Spring Boot, RESTful APIs, React.js, SQL, and Object-Oriented Programming. Skilled in developing full-stack applications, integrating frontend and backend components, and building database-driven solutions using Hibernate and Spring Data JPA. Strong foundation in application debugging, reusable components, and maintainable code, with 350+ coding problems solved.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C

Backend Development: Java, Spring Boot, Spring MVC, RESTful APIs, Microservices, Node.js, API Integration, MVC Architecture, CRUD Operations

Frontend Development: React.js, Next.js, JavaScript, HTML5, CSS3, Responsive UI Development, Reusable Components

Database & ORM: MySQL, SQL, DBMS, Hibernate, Spring Data JPA, Database Integration

Tools & API Development: Postman, Git, GitHub, REST API Validation, Debugging, Exception Handling

Software Engineering: Object-Oriented Programming, Data Structures, SDLC, Code Maintainability, Application Validation

Core CS: Operating Systems, Computer Networks, Database Management Systems

Professional Skills: Analytical Thinking, Problem Solving, Attention to Detail, Communication, Team Collaboration, Adaptability

EDUCATION

Dr. APJ Abdul Kalam Technical University **2022–2026**
Bachelor of Technology in Computer Science (AI) Kanpur, Uttar Pradesh, India

Mother Teresa Higher Secondary School **2022**
Higher Secondary – 77.75% Kanpur, Uttar Pradesh, India

Mother Teresa Higher Secondary School **2020**
Secondary Education – 83.2% Kanpur, Uttar Pradesh, India

PROJECTS

Bookify | *Java, Spring Boot, MySQL, REST APIs, Hibernate, JPA* | *GitHub*

- Developed a database-driven book management application using Java and Spring Boot, implementing RESTful APIs and CRUD operations for application data management.
- Designed REST API endpoints for Create, Read, Update, and Delete operations, enabling communication between application components.
- Integrated MySQL, Spring Data JPA, and Hibernate for database connectivity, object-relational mapping, data persistence, and retrieval.
- Applied OOP principles and MVC architecture to organize backend logic into modular, reusable, and maintainable application components.
- Implemented request validation and exception handling to manage invalid inputs, application errors, and unexpected API responses.
- Validated REST API functionality using Postman, checking HTTP status codes, request parameters, response data, and error handling.

ClearCV Interview Prep | *React.js, Node.js, JavaScript, REST APIs* | *GitHub*

- Developed a full-stack resume analysis platform using React.js, Node.js, and JavaScript to automate resume evaluation, keyword matching, and feedback generation.
- Built interactive and reusable React.js UI components for resume uploads, keyword-based analysis, structured results, and user-facing feedback.
- Developed backend workflows using Node.js for resume parsing, data processing, keyword matching, and automated recommendation generation.
- Integrated frontend and backend functionality through application APIs to enable data exchange, resume processing, and structured result generation.
- Implemented resume analysis and keyword-matching functionalities to evaluate resume content against job requirements and generate relevant feedback.

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank Java Certificate and HackerRank SQL (Basic) Certificate.
- Achieved a 5-Star Java Badge on HackerRank.
- Solved 350+ coding problems on LeetCode and HackerRank, demonstrating strong programming, algorithmic thinking, and problem-solving skills.

ADDITIONAL INFORMATION

Languages: English, Hindi

Interests: Competitive Programming, Cricket, Music
